SUMMARY

I am a passionate Full-stack software developer who enjoys turning business ideas into practical applications using code. I am skilled in front-end and back-end tech stacks such as React, Ruby, HTML, Javascript, and CSS. I have built several projects using these technologies and I would be honored to contribute my skills to the success of your company.

SKILLS

Front-End: JavaScript, React, NextJs, Redux, jQuery, HTML5, CSS3

Back-End: Rails, MongoDB, MySQL, Firebase

Tools & Methods: Git, GitHub, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools

Professional: Remote Pair-Programming, Teamwork, Mentoring

EXPERIENCE

MICROVERSE

Remote

Code Reviewer

05, 2022– Present

- Performing code reviews for other junior developers, making sure their code meets the project requirements and respects best practices in tech.
- Supporting students through Zoom calls or Slack, thus strengthening my communication and leadership skills.

ARABIATALENTS

Remote

Web Developer(Contract)

04, 2022– 06, 2022

Ar-Ad specializes in developing and executing bespoke influencer marketing plans based on particular goals, my mission was to build a website that represents the company, you can also control all of the content from a dashboard where you can manage influencers, databases, and stats.

MICROVERSE

Remote

Mentor (Volunteer)

03, 2022– 05, 2022

- Mentoring junior web developers and providing technical support through code reviews.
- Proposing improvements to code organization to improve code quality and overall performance.
- Providing advice and tips on maintaining motivation and longevity in the program.

MY PERSONAL PROJECTS

KanBan-it !— KanBan-it! is a web-based Kanban software, that supports you in managing tasks and projects with colorful sticky cards tracked on a virtual board. It lets you use your own computer screen to visualize, control, and optimize workflow. A characteristic unique to KanBan-it! is the opportunity to back up your progress on its built-in backup features.

- **Built with:** (ReactJs, Firebase, TailwindCSS, Jest , Redux)

Arabia Talents— Ar-Ad specializes in developing and executing bespoke influencer marketing plans based on particular goals, my mission was to build a website that represents the company, you can also control all of the content from a dashboard where you can manage influencers, databases, and stats.

- **Built with:** (NextJs, Firebase, MaterialUI, Jest, and NodeJs)

DISCOTIC— Discotic is a basic version of Discogs, which is a database of musical recordings. you can share & explore thousands of OG Albums & Tracks

- **Built with:** (StimulusJs, RubyOnRails, Postgres, Bootstrap)

Short Let Island— In this application, users can reserve halls for their wedding parties, conference events, etc. In this project, you can also have an admin dashboard if you log in through the admin user.

- **Built with:** (ReactJs, RubyOnRails)

WEBPHONE— WebPhone is an open-source web application that simulates a real smartphone. You will find apps, games, and features that behave and run as they were on mobile , but this time you won't need any hardware, money, or extra resources to own and run this virtual phone; all you need is a browser & an internet connection.

- **Built with:** (ReactJs, Firebase, TailwindCSS)

EDUCATION

MICROVERSE

03, 2022 – Present

Remote Full Stack Web Development Program, Full Time

- Spending 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developing skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.
